

## Pre Built Configuration Notes

StudioRIP installer offer the option to install with prebuilt configurations. This document explains these options

Name :	Example TIFF with TIFF Direct
Description:	<p>This example configuration is configured for TIFF output has and has 3 example job styles :</p> <p>TIFF OUT 175 LPI With Trapping TIFF OUT FM With Trapping TIFF OUT 150 LPI With Trapping - Flexo Texture</p> <p>This configuration is configured with no Print Manager and output tiff files directly to the C:\Users\Public\Documents\ folder Using this mode there is no TIFF history and less TIFF configuration option</p>

Name :	Example TIFF with TIFF Print Manager
Description:	<p>This example configuration is configured for TIFF output has and has 3 example job styles :</p> <p>TIFF OUT 175 LPI With Trapping TIFF OUT FM With Trapping TIFF OUT 150 LPI With Trapping - Flexo Texture</p> <p>This configuration is configured with a TIFF Print Manager and output tiff files directly to the C:\Users\Public\Documents\ folder</p> <p>With a Tiff print manager there is a job history where specific jobs or plates can easily be remade. There are also more options on the type of tiff file to be created along with other options such as sending to 2 locations</p>
